

Environmental Policy

Dacsa Group, 20th February 2018

The Senior Management of DACSA, in representation of the entire company, states the present Environmental Policy, undertaking to comply with it and to oversee that all aspects of it are adhered to, both within the company, and in what affects their suppliers and external customers.

The company is committed to conducting its business in the most sustainable way possible, using the most advanced techniques available to us, and taking the necessary steps to reduce our impact on the Environment.

To this end, the company has implemented an Environmental Management System, based in the international Environmental Management Standard UNE-EN ISO 14001:2004, to continuously improve its environmental performance.

In order to meet this commitment the company will pursue the following objectives:

1. To ensure compliance with all applicable current legislation pertaining to the environmental aspects derived from the activities conducted in our facilities, as well as compliance with other requirements to which the organisation is committed
2. To promote continuous improvement in all processes and periodically assess its environmental performance
3. To work towards the minimisation of the environmental impacts generated by activities in our facilities, thus contributing to sustainable development
4. To develop management procedures to control our environmental aspects and ensure the prevention of environmental pollution
5. To promote the culture of caring for the Environment among people who work in the organisation or on behalf of the company
6. To develop channels of communication with interested parties to raise awareness of relevant environmental information
