

# JOB POSITION: MAINTENANCE ELECTRICIAN

## RESPONSABILITIES:

- Diagnose, plan, and resolve electrical issues during the production process, ensuring the operability of machinery in the shortest possible time
- Perform scheduled and preventive maintenance to prevent failures or breakdowns in the machinery
- Propose and implement improvements to the machinery to increase production efficiency
- Record interventions as indicated by internal procedures in the software programs used for each task to ensure proper tracking.

## KNOWLEDGE AND REQUIREMENTS:

- A good working knowledge of PLCs, particularly Siemens S7 and Schneider, with the ability to program and fault find
- Experience working with Computerised Maintenance Management Systems
- Up to date IEE wiring regulation qualification
- Food industry experience, as well as knowledge of quality and food safety standards
- Experience in maintaining metal detectors
- Medium or higher vocational training in electromechanics or mechatronics
- Previous experience in resolving electrical breakdowns
- Experience of pneumatic systems desirable
